Save 55% Off List Price on a PACSystems RX3i Profinet Starter Kit

Experience the High Performance, Flexibility and Ease-of-Use of GE Intelligent Platforms' Profinet Solution

GE Intelligent Platforms is pleased to offer a Profinet Workshop Starter Kit. The kit is a full functional system that will enable you to develop an application on the new high-performance CPE305 processor and Profinet Controller. We have also included the versatile VersaMax Profinet Slave remote I/O in the package to enhance the experience. The PACSystems Profinet solution sets a new standard for integration of an open system by providing the user with easy-to-use tools.

PACSystems with PROFINET is focused on 3 major areas:

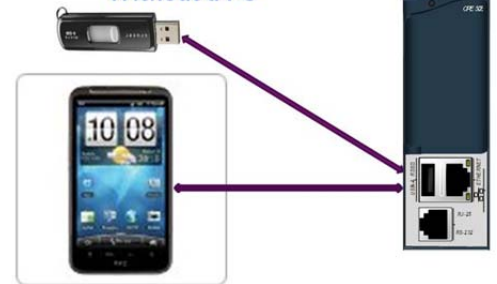

- Flexible deployment minimizing hardware and configuration
- Improved application uptime with minimal cost
- High performance, low cost simple platform

The Starter Kit Includes the Following (Starter Kit Part Number IC695STK010)

- RX3i CPE305, 5 Mbytes of user memory, built-in Ethernet and USB Master port with Energy Pack (IC695CPE305)
- RX3i Profinet Controller Module with built-in 4 port switch (IC695PNC001)
- RX3i 7 slot base (IC695CHS007)
- RX3i AC power supply (IC695PSA040)
- RX3i 8 point input simulator (IC694ACC300)
- RX3i 16 point DC output module (IC694MDL740)
- VersaMax Profinet Slave Module (IC200PNS001)
- VersaMax AC power supply (IC200PWR102)
- Mixed Discrete Module (IC200MDD844)
- Input Simulator (IC200ACC302)
- I/O Base (IC200CHS002)
- Award Winning Proficy Machine Edition Professional (IC646MPP001)
