

UNIVERSAL ROBOTS PROGRAMMING WORKSHOP

February 5th and 6th, 2019
CIMTEC Automation
Greenville, SC

The Future is Collaborative

Universal Robots Programming Workshop

February 5th and 6th, 2019
CIMTEC Greenville Office

Please join us for a one-day workshop & training course on the Universal Robots collaborative robots. You will get a crash-course on basic UR programming tailored to the attendees.

The workshop will include UR advanced programming, gripper and other EOAT usage, understanding network connections and collaborative safety.

This workshop is perfect for engineers, maintenance, operators, and/or management personnel looking for better understanding and a first dive into collaborative robots (programming and implementation).

[Register Here](#)

AGENDA

9am-3pm:

Interactive hands-on workshop where you will learn about UR advanced programming, understanding network connection, gripper and other peripheral usage, collaborative safety, mobile fleets, and more!

Lunch will be served
